About Lovense

Lovense is a leading consumer technology company in the sexual wellness industry, recognized for its innovative app-controlled, high-tech sex toys. We are well-known among both everyday users and representatives within the cam industry.

Our competitive edge is built on our intellectual property, as we own and manage a diverse portfolio of award-winning products, spanning both hardware and software. Globally, we hold nearly 450 patents across the US, Europe, and Asia. Dedicated to serving our users, our customer base spans North, Central, and South America, Europe, Asia, and Africa.

Glint

World's First Touch-Responsive Butt Plug for Couples Exploring Dual Penetration

Glint is a touch-responsive butt plug for couples, designed to enhance intercourse by synchronizing anal stimulation with your partner's thrust for a more intense, connected dual penetration experience.

The touch sensor detects contact and adjusts vibration intensity based on the contact area — the larger the area, the stronger the vibration. No need to hold the toy or operate the app, just follow your rhythm.

Compact, whisper-quiet, and beginner-friendly at just 0.84 inches (21.5mm) wide, Glint is built for comfort and effortless couple play.

LOVENSE

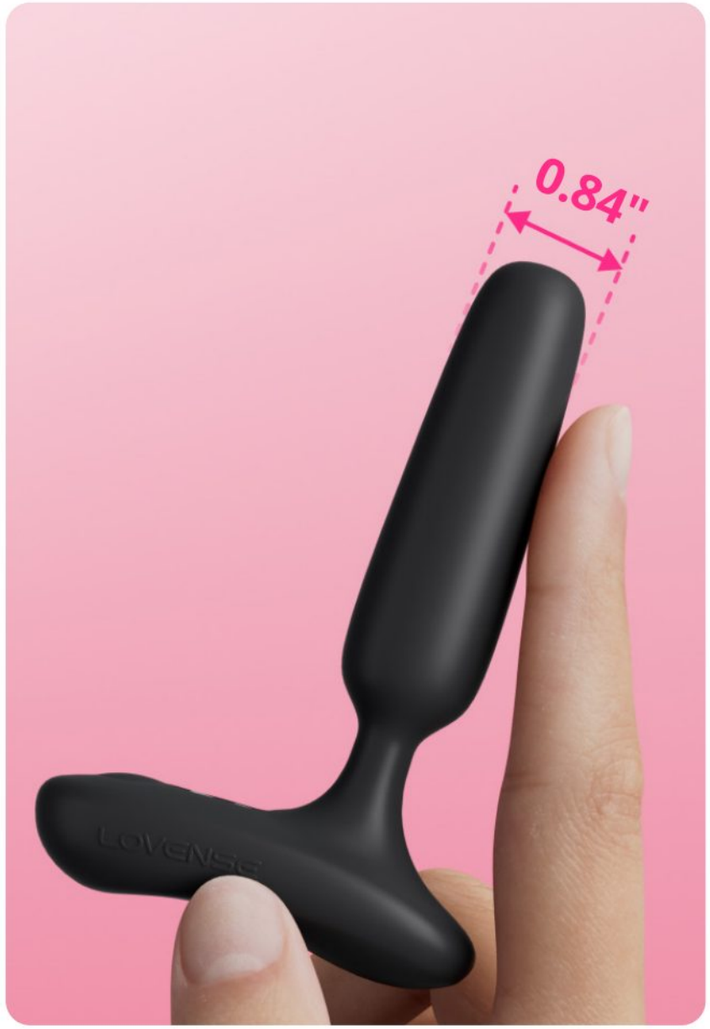

Key Feature

Touch-Responsive Sensor Base

The sensor detects contact and adjusts vibration intensity based on the contact area — the larger the area, the stronger the vibration. No phone needed during play.

3 Touch Response Modes

Choose your response style: Pulse (rhythmic bursts), Sustain (continuous vibration), or Crescendo (builds with contact). Switch between them in the Lovense Remote app.

Master Control Any Lovense Toy

Glint doubles as a controller — use it to take command of any other Lovense toy. One toy to control them all.

Compact & Beginner-Friendly

The plug's insertable section is based on that of Lush Anal. Its compact design (0.8 in / 21mm × 70mm, 55g) increases comfort during insertion and use, and its approachable size reduces the barrier to entry. The rounded tip ensures comfort in every position.

LOVENSE

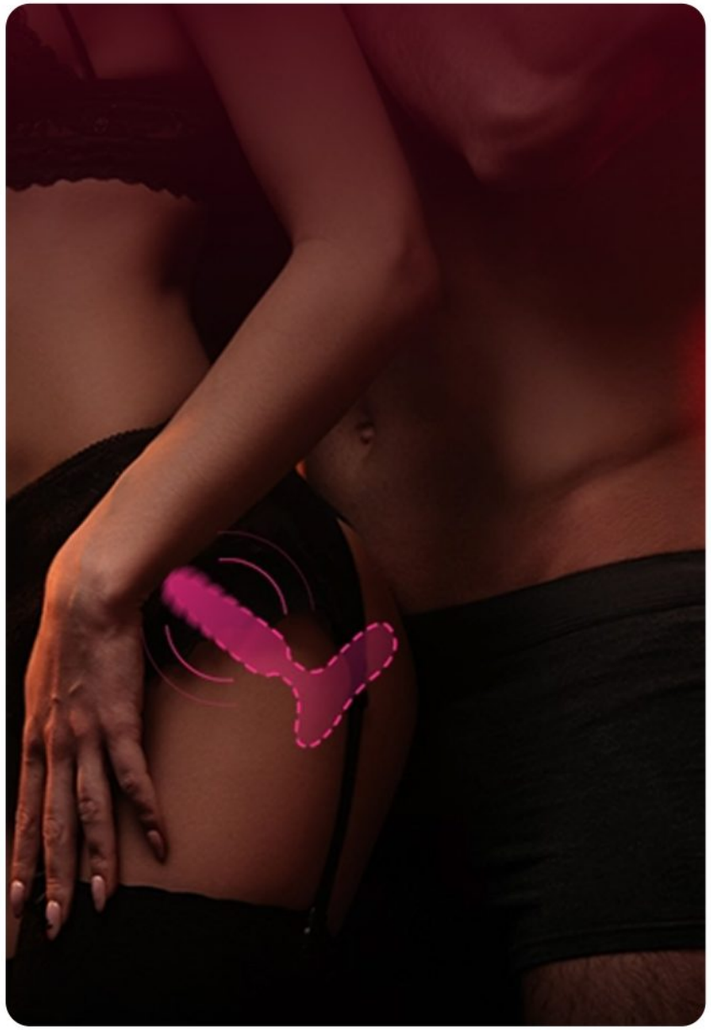

How to Play with Glint?

During Sex

Designed for dual penetration — wear Glint during intercourse and let each thrust trigger synchronized vibrations. No app needed. Both partners feel the added intensity, naturally.

Solo Play

Sync your favorite playlist and let Glint vibe to the beat of the music. Or enable sound-activated vibrations and let your environment set the rhythm. Wear it around the house for an unpredictable, playful layer to your day.

Foreplay

As foreplay heats up, use your fingers to grip more of the base and increase intensity with just a touch. Spanking, caressing, squeezing — every interaction triggers vibration feedback, combining anal stimulation from inside and outside. Use Glint during foreplay to build anticipation.

Long-Distance

Control your partner's Glint from anywhere in the world via the Lovense Remote app. Stay connected no matter the distance — trigger vibrations, switch modes, and share intimate moments in real time.

LOVENSE

Touch Mode

— Your Pleasure, Your Way

Glint's signature feature: a touch sensor that turns physical contact into vibration feedback. Here's how each mode works:

Pulse

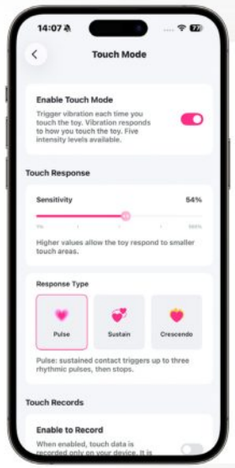

Sustained contact triggers up to three rhythmic vibration pulses, then stops.

Sustain

Vibration continues as long as touch is maintained. Remove contact and it stops.

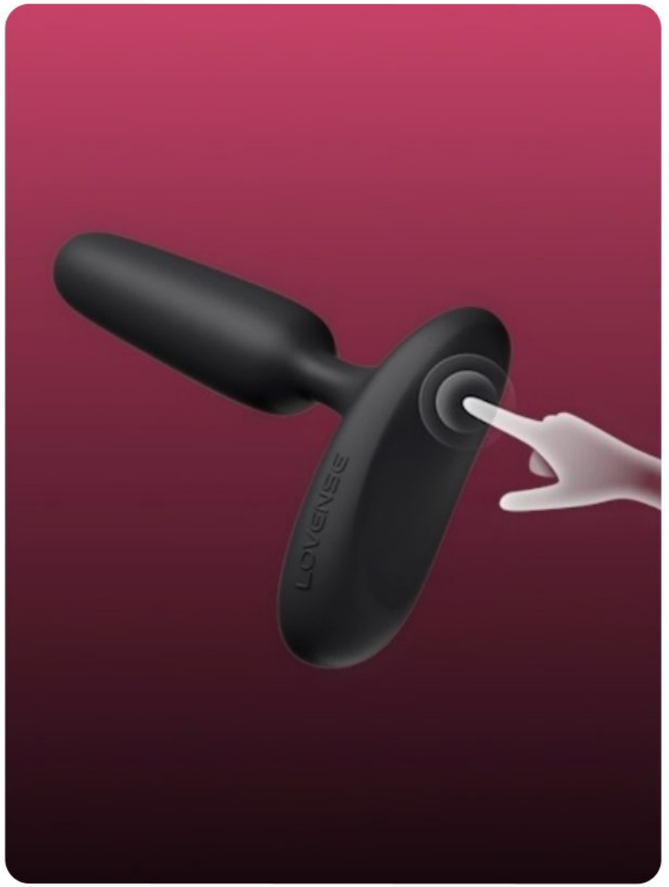

Crescendo

A steady low vibration with an instant intensity boost while touch is maintained, then returns to baseline when contact is removed.

Adjustable Sensitivity

Users can adjust the sensor's sensitivity in the Lovense Remote app (Settings > Touch Mode > slide to adjust). Touch mode can also be turned off, switching to button control mode (3 vibration levels, 4 patterns). Default startup mode is Touch mode; a single press of the button switches to button mode.

LOVENSE

Touch Record

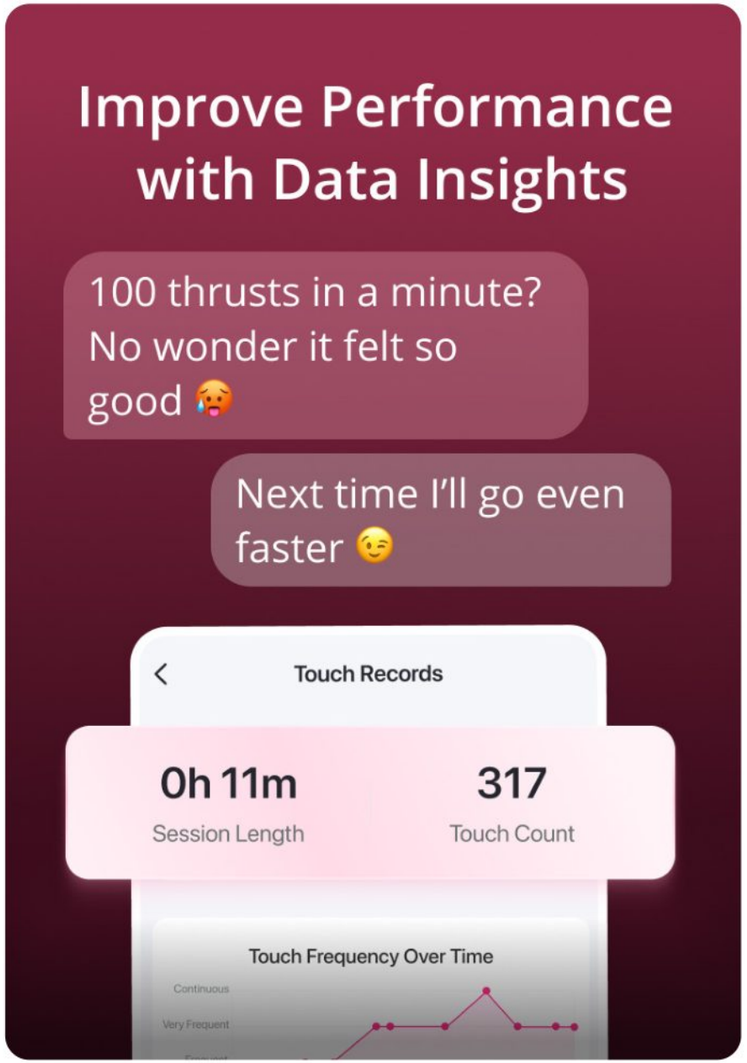

— Improve Performance with Data Insights

Touch Record captures your Touch Sensor activity during each session. Look back on intimate moments, track your performance, and replay saved patterns anytime.

What Gets Recorded Once enabled, the system tracks Touch Sensor activity and presents it after each session:

- **Touch Frequency**
  Records each instance of the touch sensor's activation (e.g. thrust count)
- **Date**
  When the session took place
- **Speed**
  Registers the vibration speed of each activation
- **Touch Duration**
  Records the duration of each session and total time

Note: This feature is off by default. All user data is encrypted and stored solely on your device.

The Lovense Ecosystem

One Ecosystem. Endless Purchases.

Lovense is more than a toy — it's a connected ecosystem. Every product works together through the Lovense Remote app, creating a seamless experience that keeps customers coming back.

Buy Toys

Customer discovers and purchases their first Lovense product.

Connect App

Pairs with Lovense Remote — unlocking full control and features.

Explore Platforms

Uses toys on cam sites, games, and interactive content platforms.

Join Community

Connects with other users, shares experiences, deepens engagement.

Discover More

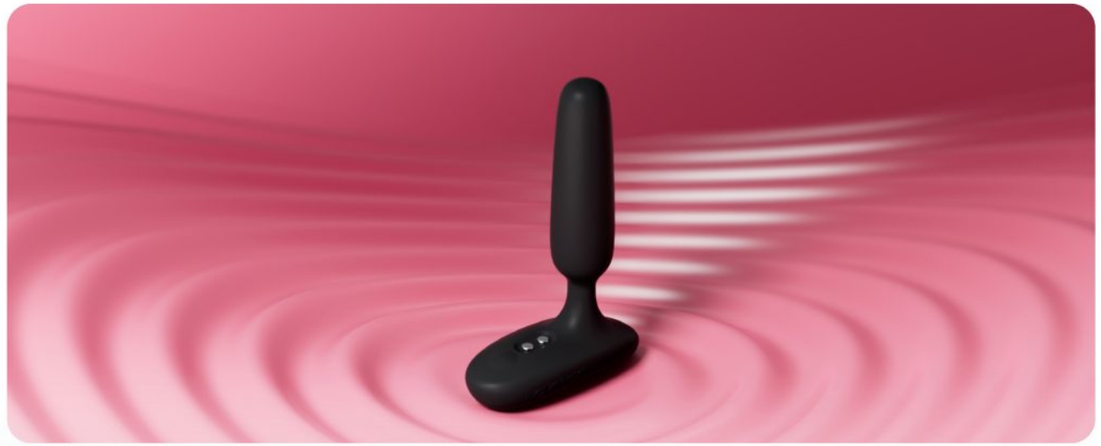

Wants new experiences — comes back to buy more toys. Loop continues.

LOVENSE

Master Controller

Master controllers are Lovense toys that use movement to control synced Lovense toys. For example, the harder you grip Glint, the stronger a paired Lush 4 will vibrate.

Glint is the newest master controller — and the first to use touch to control synced toys.
